FEEDING DIRECTIONS

Feed laboratory feline diet free choice. Keep feed available to the animal at all times. For kittens starting to eat on their own, the dry feed can be moistened with water, milk or broth to encourage feed consumption. Growing and breeding cats will consume more than adult cats maintaining body weight. Plenty of fresh, clean water should be available at all times.

1. Formulation based on calculated values from the latest ingredient analysis information. Since nutrient composition of natural ingredients varies and some nutrient loss will occur due to manufacturing processes, analysis will differ accordingly.

2. Nutrients expressed as percent of ration except where otherwise indicated. Moisture content is assumed to be 10.0% for the purpose of calculations.

3. NDF = approximately cellulose, hemi-cellulose and lignin.

4. ADF = approximately cellulose and lignin.

5. Physiological Fuel Value (kcal/gm) = Sum of decimal fractions of protein, fat and carbohydrate (use Nitrogen Free Extract) x 4.9,4 kcal/gm respectively.

NOTE: When assayed, actual levels may vary from calculated values.
